MINEDEX Major Resources Projects Map

Citation

Unique ID	0F725F87-6B3F-40EE-A76F-EB1B276AE5B7
Title	MINEDEX Major Resources Projects Map
Jurisdiction	Western Australia

Description

Abstract	The major resource projects extract is a point representation of Western Australia's economically significant resource projects. Selected resource projects which satisfy one of four criteria are shown. • Principal resource projects operating with sales value >\$5 million in the previous financial year • Resource projects currently under development • Planned mining and petroleum projects with at least a prefeasibility study (or equivalent) completed • Principal resource projects recently placed under care and maintenance This information is sourced from MINEDEX, which provides a coordinated, project-based enquiry system for textual information on mines, deposits, prospects, etc., and related infrastructure. The Major resource projects map custom data extract is a point representation of the State's major resource projects (excluding petroleum fields) that appear on an annually produced map. This data is held in GDA 2020 decimal degrees.
Search Words	INDUSTRY-Mining MINERALS
Geographic Extent Polygon	-35.50 112.50, -35.50 129.00, -13.50 129.00, -13.50 112.50 13.50 S 112.50 E 129.00 E 35.50 S
Reference System	GDA2020

Dataset Currency

Creation Date	2002-01-01
Publication Date	2021-10-31

Dataset Status

Status	onGoing
Maintenance and Update	annually

Access

Available Format Type(s)	ESRI File Geodatabase, ESRI shapefiles, MapInfo Tab files, Google Earth KMZ files and ASCII CSV files
Available Format Version(s)	ESRI File Geodatabase version 10, ESRI layer files version 10.4, MapInfo 10
Access Constraints	copyright
Linkage	http://www.dmp.wa.gov.au/datacentre
Application Profile	Data and Software Centre
Function	download

Data Quality

Lineage	Data collated from ASX reports, Mining Proposals and Annual Mineral Exploration Reports. Transformed from GDA94 to GDA2020 using GDA94_GDA2020_conformal_and_distortion.gsb transformation via FME.
	Varies – site location chosen to represent location of entire project

Positional Accuracy	
Attribute Accuracy	The accuracy of the attribute information on all datasets in this data package is estimated at 95%
Logical Consistency	Compared to Site and Project location and previous estimates during capture. Classified to eliminate duplication.
Completeness	Dependent on data publically availability
Credit	Minedex data team
